DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Cindy S. Kaplan (408)-399-5608 on November 19, 2007.

Amend Claims 6 and 8-10 as follows;

Claim 6 (Currently Amended): A computer ~~program-product~~ readable medium encoded with a computer program for operating a node in a label switched network, said computer program ~~product~~ comprising: code that receives a request to establish a proposed label switched path through said node;

code that determines that a bandwidth requirement of said proposed label switched path cannot currently be met;

code that, after receiving said request and prior to expiration of a time period, receives information from one or more downstream nodes along said proposed label switched path identifying one or more currently configured label switched paths that have been preempted downstream; and

code that, after expiration of said time period, selects one or more label switched paths to preempt from among currently configured label switched paths, said selecting

being based at least in part on said received information; and a storage medium for storing the codes.

Claim 8 (Currently Amended): The computer program product of claim 6 further comprising: code that sends a message indicating acceptance of said proposed label switched path prior to expiration of said time period.

Claim 9 (Currently Amended): The computer program product of claim 6 wherein said code that selects favors local preemption of said currently configured label switched paths that have been preempted downstream

Claim 10 (Currently Amended): The computer program product of claim 6 wherein said one or more label switched paths selected for preemption have a lower priority than said proposed label switched path.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1, 6, 11 and 16 are allowed. The prior art discloses system for operating a node in a label switched network, and receiving a request to establish a label switched path through said node and determining bandwidth requirements of said proposed label switched path.

The prior art however fails to disclose or suggest receiving information from one or more downstream nodes along proposed label switched path identifying one or more currently configured label switched paths that have been preempted downstream and after expiration of a time period, selecting one or more label switched paths to preempt

from among currently configured label switched paths, said selecting being based at least in part on said received information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raj K. Jain whose telephone number is 571-272-3145. The examiner can normally be reached on M-F 8-5.
